Abstract: An abstract is a microcosm of the full article, it must be concise and grammatically correct. Be sure that the abstract should not contain abbreviations, footnotes, references, mathematical equations or tabular material. **(200 to 300 words)**

Keywords: (Limit to 5 keywords)

1. Introduction

Please use the AIMS template to prepare your manuscript, before you submit to our journal. Please read carefully the instructions for authors at <http://www.aimspress.com> [1]. These are important instructions and explanations. Thank you for your cooperation.

An Introduction section is to clarify the research backgrounds and the objectives of the work.

2. Preliminaries

2.1. Subheading

Manuscript should be in double-column format. The maximum permissible length of each manuscript is 10 pages including references.

2.1.1. Sub-subheading

The first letter of headings and subheadings should be capitalized.

3. Main results

The main results should be clear and concise.

Table 1. Caption of the table.

(Three-line table is preferred.)

Figure 1. Legend of the figure.

Supplementary (if necessary)

[add an equation here] (3.1)

4. Conclusions

The conclusion section should review the main results of the paper and elaborate on the significance and suggest extensions of the work.

Use of AI tools declaration

The authors declare they have not used Artificial Intelligence (AI) tools in the creation of this article.

Acknowledgment (All sources of funding of the study must be disclosed)

We would like to thank you for following the instructions above very closely in advance. It will definitely save us lot of time and expedite the process of your paper's publication.
